

IRISITY AND MILESTONE JOINT SOLUTION BRIEF

THE COMBINATION OF A LEADING VIDEO
MANAGEMENT WITH ADVANCED VIDEO ANALYTICS

OUR PARTNERSHIP

Irisity and Milestone combine functionality to offer end-to-end intelligent video surveillance solutions for real-time detections and alerts, video investigation and business intelligence applications. As a longtime member of Milestone's Technology Partner Program, Irisity's IRIS+ video analytics are seamlessly integrated within Milestone's video recording and management platform, enabling customers to receive, display and manage real-time events, post-event investigation and business intelligence reports on Milestone's XProtect.

ACCURACY AND RELIABILITY

LEADING THE WAY

IRIS+ is Irisity's feature-rich AI-powered video analytics software platform that represents the future of video intelligence. IRIS+ delivers a broad set of highly sophisticated video analytics capabilities for enhanced security and safety. Available as a cloud-based SaaS or as an on-premise software, IRIS+ offers capabilities that meet the evolving needs of Milestone customers. Its scalable architecture scales to address any number of cameras across multiple distributed sites, while offering the most attractive TCO.

ACCURATE INTELLIGENCE

The combination of Milestone XProtect with Irisity IRIS+ allows for accurate detection and analysis of events of interest in real-time. Identified from various video sources, the events are then sent as alarms Milestone XProtect Smart Client.

BETTER TOGETHER

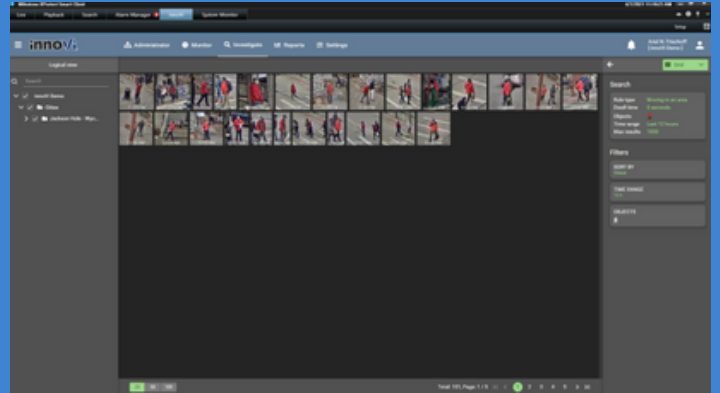

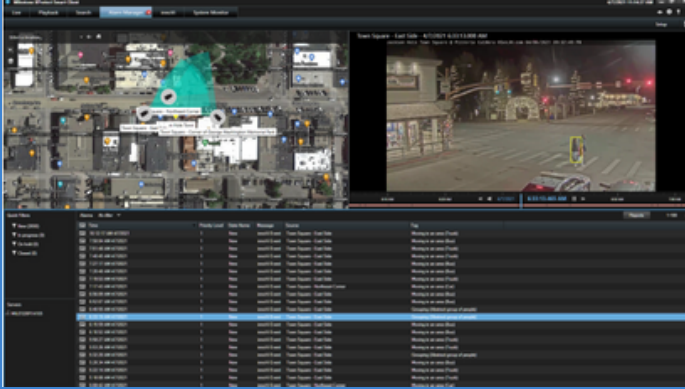

End users benefit from operating with a single client application. Additionally, an intuitive process enables users to receive events with a variety of analytics from multiple cameras and manage AI events with real-time search and video recordings of specific events.

CLOSE COLLABORATION

With the comprehensive integration between IRIS+ and XProtect, users can conduct investigations from XProtect Smart Client. This process empowers retrieval of relevant video data from the original recorded video, according to customized queries.

INTEGRATION IN ACTION

How does it work?

IRIS+ ADVANTAGES

Irisity has optimized IRIS+ to work seamlessly with a wide range of Milestone solutions. Irisity has developed customized integrations to ensure a seamless connection with Milestone offerings, resulting in improved video analytics accuracy and support for Milestone video management features.

A longtime Milestone partner, Irisity has developed an AI-powered video analytics solution that is used in a variety of global and mission-critical deployments.

Lowest TCO

Distributed architecture with deep-learning over Intel CPUs result in a cost efficient solution.

Cloud or On-Premise

In addition to on- premise deployment and licensing models, IRIS+ is also available as a cloud-based SaaS.

Robust and Open

Irisity operates with a wide variety of third-party security solutions and a broad feature set in a single platform.
